Tables Equations and Figures

Table 1 summarizes the results. The normalization in Eq. 1 is applied first.

Table 1. Classification results

Model	Accuracy	F1
Bi-LSTM	0.99	0.98
Bi-GRU	0.96	0.95
SVM	0.91	0.90

$$z = (x - mu) / s \tag{1}$$

$$SPL = 20 \log(p / p_ref) \tag{2}$$

where mu is the mean and s is the standard deviation.
